The 5th Toda City Lifelong Learning Promotion Plan

Summary Version

The year of Plan:2021~2025

Toda City Board of Education Secretariat

Lifelong Learning Division

【The point of the plan】

To create opportunities for learning

To learn for people to live together in the community

Re-Learning for workers

To learn by age

To create opportunities for learning

- We create an opportunity for citizens to learn comfortably.
- We create an environment for sending information.
- We create a system that everyone feel learning fun.

To give new learning opportunities

To provide of learning using the Internet, such as audio-books and videos

To devise a way to convey information

- Survey for creating a website for lifelong learning in Toda City
- Enhancement of consultation corner

To participate in community activities

- To create opportunities for young people to participate easily in community development activities

Re-learning for workers

- We create an environment **that you can learn while working** .
- According to an questionnaire, many young people answered **that they want something to learn again** in order to improve their work skill.

Support for getting jobs

⇒ Employment Support courses for women and single parents, Entrepreneurship support courses

To spread sending information and re-learning

⇒ To increase distribution of information with new method or learning for a short term, and to search for the citizen's idea concerning the study of learning record, or re-learning

To survey cooperation with universities, etc

- Enrichment of qualification courses and welfare courses, etc

To learn for people to live together in the community

- Aiming for, “ **a society where everyone can continue to learn** “, we provide a place where everyone can learn, including **foreign residents** and **people with disabilities**.
- We provide you how **to protect your lives** from the dangers that can occur while living in the community.

Learning according to individual wishes

⇒ Creating a structure that enables us to respond to individual wishes, such as multilingual information and sign language interpretation

Learning to “ protect lives”

⇒ Lectures to protect citizens from disasters, lectures on measures against infections , disaster prevention drills for foreigners

Learning that leads to understanding of diversity

⇒ Opportunities to interact with foreigners living in the city

To learn by age

· We provide the necessary learning for each so that all generation, from children to the elderly can continue to learn.

Courses suitable for the wishes of generation

⇒ We devise to suit the person taking the course, such as the content, time, notification method, etc.

To provide learning by age

⇒ We provide the necessary learning at each age, from pre-elementary school children to the elderly.

Learning support for young people

⇒ We support workers to re-learn and provide a place for learning that give the citizens an opportunity to participate in the activity of the community.
